

## MANUAL PULL STATION

**Surface Mount**

**Recess Mount**

This Manual Pull Station may either be surface or recess mounted. The oversized cover is large enough to cover the sheetrock access hole for the standard 4" octagonal box and remain attractive and functional. Manual Pull Stations should be located in the path of egress and mounted at a height conforming to the local code requirements. If spare parts are needed, the pull stations are composed of the Ring Pin (P/N 00160-P024), Cover Screw (P/N 13257-P012), Screw Set (P/N 12744-P012), and the Pull Handle (P/N 12766-P001)
